

# Library Management System

(specially designed for school libraries)

Name : Niluka Hemamali

Name : DIT10034

# Introduction

- Most of the schools in Sri Lanka has it's own libraries.
- Out of those libraries when taking some schools they have small libraries and even though they are small maintenance of books is hard.
- As a solution for that I came up with a software solution, which is a simple library management system which is specially designed for small school libraries.

---

System is  
capable of ?

---

Access control

Doing CRUD operations  
related to books

Check the book counts

# Advantages of the System

Improve efficiency.

Better organization.

Increase security.

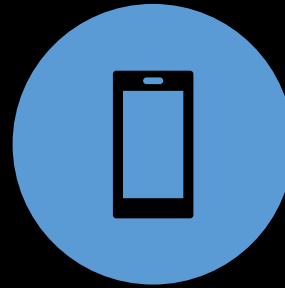

Cost effective.

# Future Developments

Develop an option to categorize books.

Make a mobile application to integrate with this system.

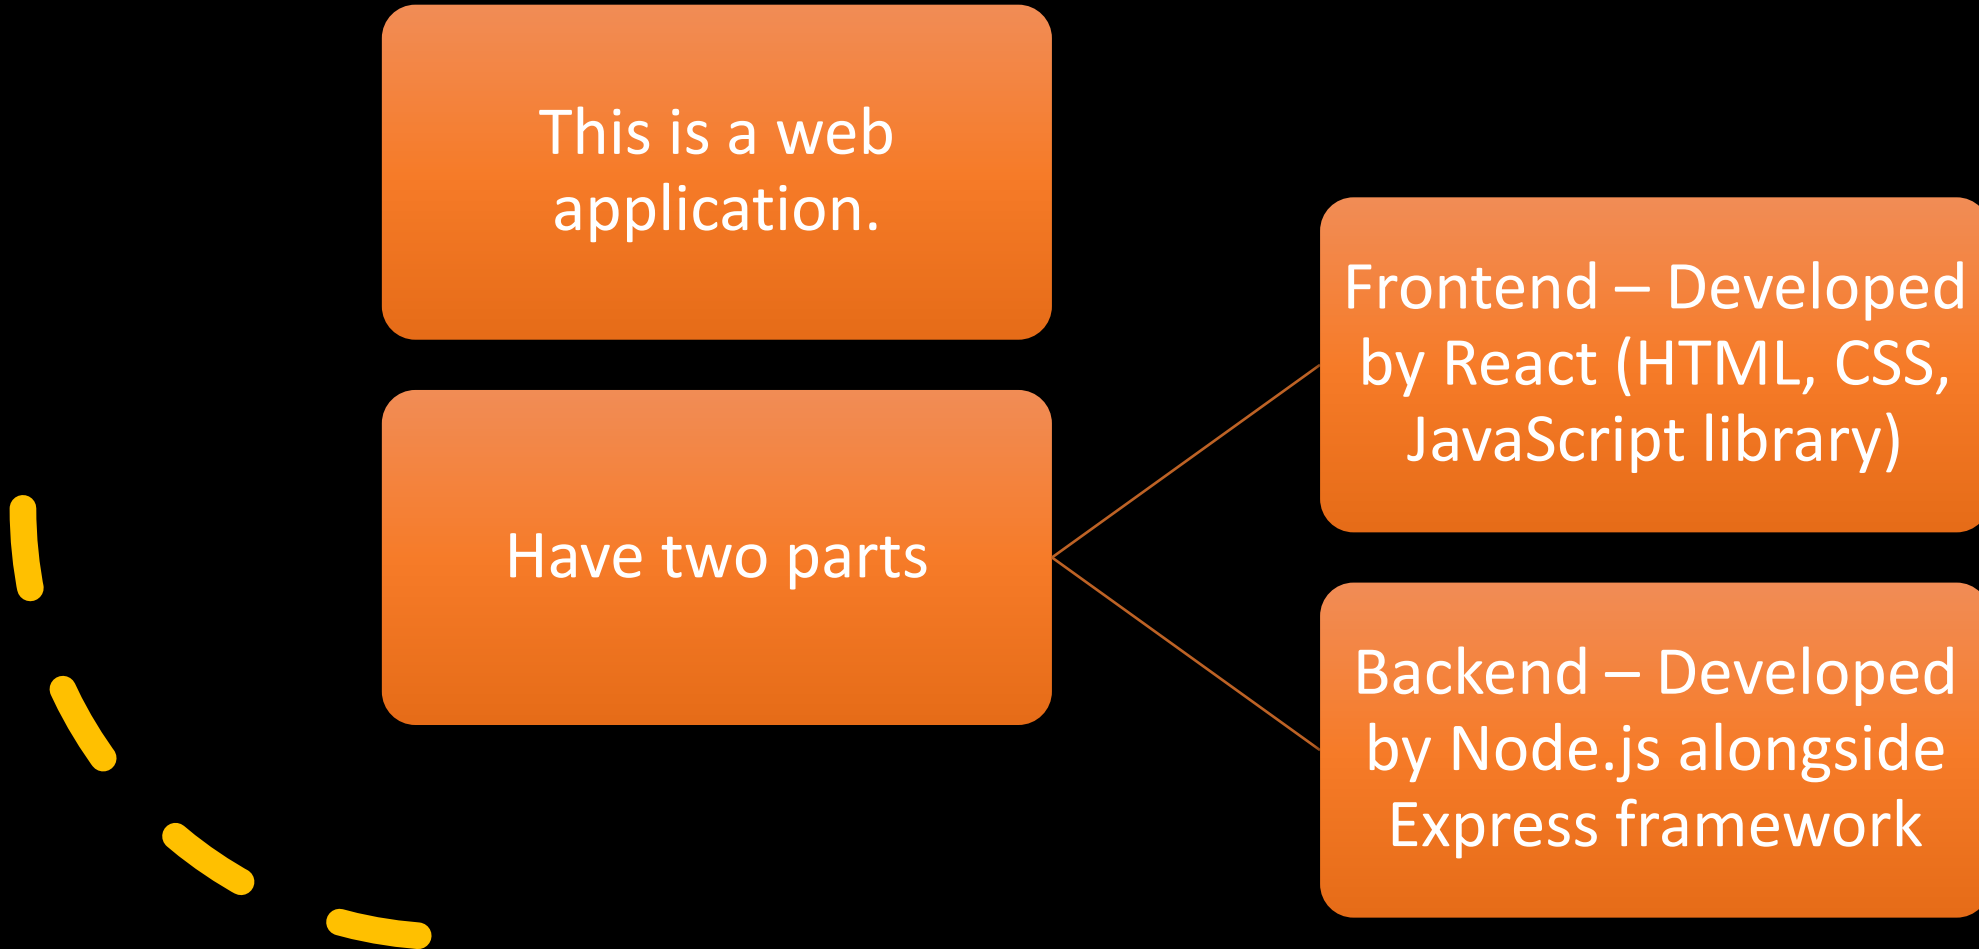

Granting access to students as well.

Display more statistics related to system in the dashboard.

# Structure of the implementation

The background is black and features several abstract geometric elements. A large circle with a thin white outline and a thicker light green inner border is centered. To the left of the circle, there are two horizontal wavy white lines. In the top right corner, there is a small orange circle with a white outline. In the bottom left corner, there is a small solid orange circle. In the bottom right corner, there is a large solid orange circle. To the right of the large circle, there are five parallel white diagonal lines.

Thank you !!

Q & A
